

Storm

Safety.

Plan ahead before bad weather hits. Learn how to stay safe before, during, and after a storm.

- **Downed wires should always be considered “live.” Stay at least 30 feet away from downed lines, and don’t go near the pole or anything touching the line. Immediately contact PSE&G, at [1-800-436-PSEG \(7734\)](tel:1-800-436-PSEG), via our mobile app or our [website](#), to report downed wires and dial 911 if an immediate hazard exists.**
- **Electric current passes easily through water, so stay away from downed power lines and electrical wires. Don't drive over – and don't stand near – downed power lines.**
- **Downed lines can potentially be hidden in standing water. If you encounter large pools of standing water, stop, back up and choose another path.**
- **To prevent carbon monoxide poisoning, do not run any gasoline-powered generators in a garage or any other enclosed space.**

If you are on life-sustaining medical equipment, ensure that you alert PSE&G in advance and notify your local police and fire departments. For more information, visit www.pseg.com/life.
